PROFILE

Motivated Computer Science student with a passion for building meaningful software and analytical solutions. Strong communicator and team player with proven experience in programming, data analysis, and problem-solving. Quick to learn new technologies and contribute effectively in team environments.

EDUCATION

University of Manitoba May 2024 - Present
B.Sc. Computer Science, minor in Mathematics

RELEVANT EXPERIENCE

Data Science Intern Sept 2025 - Dec 2025
IG Wealth Management Winnipeg, MB

- Analyzed large-scale financial datasets using Python and SQL, supporting data pipelines and ML workflows on GCP and Vertex AI.
- Designed and maintained datasets, reports, and analytical tools to support business and operational needs.
- Applied statistical analysis and critical thinking to evaluate model performance and interpret results.
- Worked collaboratively in a team environment while practicing Agile methodologies (sprints, stand-ups, code reviews).

VOLUNTEERING

Activity Volunteer Apr 2025 - May 2025
Math Mania - Science Rendezvous 2025, University of Manitoba

- Engaged with children and adults at event by promoting activities, answering questions, and creating a welcoming atmosphere.

AWARDS

- Winner, UofM .devClub Hackathon (Feb 2025): Collaborated with a team to build a stock market insights web app, earning Best Impact Hack and Legend of the Hacks awards.

SKILLS

- Programming Languages: Python, C++, Java, SQL
- Data Science Tools and Analytics: Pandas, NumPy, scikit-learn
- Cloud & Databases: Google Cloud Platform (GCP), MySQL, PostgreSQL
- Development Tools: Git/GitHub, Docker, Linux/Unix
- Software Practices: RESTful APIs, Agile (Scrum, code reviews)
